CANADIAN AFFAIRS.

Cor 3 spondence of The Tribo

MONTREAL, Tuesday, Oct 3, 1850. The Committee to whom has been entrusted the control of the preparations now in progress, preparatory to the opening of the Grand Industrial Exhibition, have exerted themselves with creditable zeal, and the citizens bonorably contributed to promote the success of this first attempt at a National Fair. The new market buildings, which are extensive and admirably adapted as an exhibition, already contain sundry specimens of the products of agriculture and manufacturing indus. try. The Theater is about being boarded over, and the larger room of the Masonic Hall decorated for the intended Ball, an incident in the festivities and rejoicings which cannot fall to attract the fair sex from the United States, who may be curlous to see a large body of the British Officers figuring in the dance in full regimentals. There is to be a public dinner provided by the Corporation to which distinguished Americans will be invited, the tickets for that purpose being now forwarded. There are three articles peculiar to Canada, which the Committee contend cannot be surpassed if equaled, in the world, and they rely upon their excel-lence to render the Canadian contribution to the London Exhibition not unworthy of notice. The enumeration is first, Wheat, of which Upper Canenumeration is first, Wheat, of which Upper Canada may proudly say, that none better can be
grown. The rich specimens of Copper, one from
the Lake regions, and the endless varieties of wood
adapted to every use, to be found in our forests.
I enclose you a programme of the proceedings
which are to follow each other on the 17th, 18th,
and 12th days of October. The Hotel Keepers
are preparing in advance for the Influx of visitors, fitting up private dwellings and extending
their means of accommodation in every way. Our
weather has had a wintry feel and showers of hall
have fallen here. In Quebec snow has been seen. have fallen here. In Quebec snow has been seen. The reduction of the postage rate has been temporally delayed. Some squabble in Prince Ed-ward Island is the indirect cause of the pause

FROM BERMUDA.

We have received a file of papers by schooner Favorite, Capt. Higgs, 12 days from Bermuda, from which we extract the following items of intelli-

A party left St. John, N. B. about two months ago in the schooner Olive Branch, for Turk's Island, under the guidance of a person who had followed the sea, in search of a sum of moneyminical to be £70,000 in gold-buried there some years since. The schooner arrived at Grand Cay on the 30th of August, took in a part of a cargo of salt, and on the Sunday following proceeded to Sand Cay, where the treasure was deposited. The Inhabitants having been apprised of the objects of the crew, their proceedings were watched. The gold diggers landed at Sand Cay about noon, and at once commenced digging. A number of people moon followed them from Salt Cay, but did not reach the island till 5 o'clock, when the schooner set all sail, and steered for St. Domingo. On landing there were fire holes found open—one of which had been terraced, and though it was generally believed that treasure had been removed, yet it was thought that all reported to be there could not have been found in the short period of time the Olive Branch was at the Islands. The new comers commenced grabbling with their hands in the sand, in the hopes of finding something to repay them for their trouble, till they lacerated their fingers dreadfully when then thought it advisable to send to Salt Cay for pick-axes, hees, &c They were still at the Islands at the last accounts. The Small Pox of the most virulent description

—of the same type that proved so fatal the past year at the island of St. Vincent—has shown it self at Barbadoss. There are instances of persons who were vacinated some years ago, having taken

the disease new prevailing.

An improvement in ouring Sugar has been discovered by Mr. Wm. Dramn of Barbadoes, which it is said will save to that island above £50,000 per A light house is to be built on Grand Turk. The

inhabitants of Turks Island are luxuristing on the

proposed construction of an ice house, and their consequent ability to include in ice creams.

A large natural tank of fresh water has been dis-

covered at Turks Island in a cave several feet be-low the surface. This is a great relief to the in-habitants, who are often put to inconvenience and expense for that necessary serioie.

LABOR MOVEMENTS.

There exists at present a great movement among all the German Trade and Scientific Associations, as well as among the Americans. Congresses are called and have been held during the last week, particularly at Philadelphia, to consider the formation of a league among all the Working Associations of the United States, to constitute a Con-

The first Congress of the GERMAN GYMNASTICS OF NORTH AMERICA, was held last week at Philadelphia. From the Resolutions passed there, we quote the following

Resolved, Tear the United Delegates in their first session of the North American Gymessics, recognize as their first principle, the furtherance of Socialism, and the endeavorings of the Social Democratic party. This with the bodily cultivation of them, he must unite and resitze Socialism. that is the greatest possible independence, and join himself to the great stuggle of humanity for the Emancipation of the Human race.

o the great stage, or the desired of this Union shall be collected, Reserved, That a joint find of this Union shall be collected, which is to be shall televant by a Select Committee of the Bond, which shall be desired to the following purposes: For extraordinary occasions, part of the funds is to be created; 2 For the formation of new Granassic Associations in the United States; 3 For the support of European childral Ranagees, 4 For the distributions of beaks and durchless, cultivating promulgating the apirit and the sim of the Association. The Seat of the Provisional Directory will be

In the City of New-York.

THE GIMASTIC ASSOCIATION (TURN VEREIN) OF NEW-YORK- Which forms another society for only gymnastic purposes, declared in its session of Thursday to be opposed to the above Resolutions, and not to be willion to units any social or political and not to be willing to unite any social or political principles with the Society.

THE CABINET-MAKERS held on Thursday a very interesting meeting; they finally resolved to pay their share to the German Workingmen's Congrees. This share will amount to \$60.

THE TIN AND SHEET-IRON WORKERS DESSED

the same resolution. THE BOOT AND SHOEMAKERS' ASSOCIATION held also a meeting last week; they received a report of their Cooperative Store, 122 Center st. It was stated that in consequence of the situation of this shop in that part of the City the prices ought to be reduced. This was left to the consideration of the foremen. It was faither deliberated how the necessary means might be procured to secure the existence of the shop.

THE UPHOLSTERERS held their regular meet ing on the 9th inst. It is to be expected that a strong union of this society with the Cabinetmakers and Sculptors, will soon take place. Many speakers expressed their conviction that the Society will then be able to anstain their wages at \$1 25 per day. It was resolved that the members of the Association should, within a month, not work any longer in the same aboy with persons working for lower wages than adopted by the Society. Each member will be bound to denounce such men, who never will get any work in a shop where the members of the Society are at work. In consequence of this resolution many persons and employers are now denounced. But in the mean time a praise-worthy exception was mentioned, Mr. Newhouse, had declared that he would engage no other journeyman Upholsterer but a member of the Asso-

Large Robbery at Burlington, Vt.—A letter from Burlington states that L. G. Chittenden's room at the American Hotel, Vt. was broken into an Wednesday night, and a wallet containing \$1,100 in cash, and some notes of hand, taken therefrom. There were sight bills of \$100 cach, on the Commercial Bank, balance Vermont money. A gold peaknife marked "D. B. B." was also carried away.

LETTERS ON NEW-MEXICO...NO. 1. Mineral Wealth of the Territory - Second only to California.

BY CORA MONTGOMERY Correspondence of The Tribune.

EAGLE Pass, Wednesday, Sept 11.

Those who speak of the "little value" of New-Mexico to a rich, strong and adventurous people, like curs of the Union, are wide of the mark. Locked up in mountains and deserts, as if by Nature, and its borders forever bristling with the ances of hostile Indians, it was to feeble, inert Mexico, like a silver cashet of vast, uncounted treasure in the grasp of a dragon. She had neither the daring nor potency to face the encounter and win the prize. With our bold, enterprising and powerful Union lies the magic force to disenthral this enchanted land, and pour the light of intelligence into the glittering depths of her ore

I grant you full leave to smile incredulity now, if you will consent to remember this prediction, at the day it calls for fulfillment. New-Mexico-f hope in its day of Federal baptism they will find a better name, and keep it out of the class of New. etc States-but that region we now term New-Mexico, will, when admitted as a State, rank next to California in mineral wealth. The harvests of her mountains will be in shining coin. They are there and are only waiting the hour and the men to bring them forth in copious abundance-Every practical miner, every scientific man who has visited the country concurs in the almost universal presence of silver in those huge valleys and fissures that furrow the mountains with their deep wrinkles. Copper lays about visibly, at the surface, in great masser, west of Abbuquerque, and other places; not to mention a host of other minera's, of high value in commerce and the arts, which are heaped up in those stern and sterile hills as in weret cuses, is a quantity and purity hitherto un. exampled in the most favored mineral regions. Silver, however, is the predominating gift, and AR. GENTA should be the name of New Mexico, for she is, or will be, the silver State as undeniably as Calornia is the golden one. There is this ofference n the gathering of the metals-and this in her in the gathering of the metals—and this in her former lawless, unprotected state, placed an impassible chasm between the mine har vests of New-Mexico and the capitalists who alone had the power to make them fruitfal Gold is found in particles and lumps as if sweated up from the dapths of its primitive layers through the pores and stratifications of the earth in pure fever drops, in the forvency of those mighty volunic convulsions which precedes mans history. Bilver coursed up in fuller and more connected tides through the wounds and rifts of the heaving earth, but the bolding stressets melted and carried with them in their flow large alloys of the baser minerals. Silver cooled in veins that meander through the mountains, cast up by the same earthquake throes that scared the precious metals from make threes that scared the precious metals from quake threes that scared the precious metals from their lower depths, and these veins are always additorated by foreign substances, and often so overpoweringly that there is not enough silver present to pay for their working. To follow up these into the earth and prosecute their lead for hundreds of feet below the surface; to break up the mixed quakers is the surface. hundreds of feet below the surface; to break up the mixed minerals, fused and baked by volcatic beat; to separate, purify, resist and prepars for market the pure silver, is an affair of science and capital very different from taking up a pan of carth and washing from it the granulated gold. Strong arms and a willing heart is a sufficient expital for the adventurer in the gold diggings. The required art is soon learned there. Silver demands a more complicated preparation, but when that preparation is once made the returns are sure and as emple as in the gold fields. The English comparises who employed the requisite capital and science to pump out some water flowed and abandoned mines in Mexico have realized millions from investments of thousands. This capital, this science, this system, can now be applied to the country on and west of the upper Hio Bravo under the security of a strong and stable Government. This region will now have what it so much needed, an outlet and irlet through a safe and friendly c untry. This want has repressed and hemmed in her resources like the iron bars of a care, but now our Government misst examine and indicate routes of communication between the old States and the Pacific, and the most direct route must skirt the silver region. Capital, or associated labor, the best and most productive capital that can be employed in mining, will pause on its way to study and develon the immense capabilities of Newployed in mining, will pause on its way to study and develop the immense capabilities of New-Mexico. If an accurate comparison can be insti-tuted, it would probably be discovered that the silver mines of Mexico have returned more liberal profits, in proportion to the capital employed, than the gold mines, though there has been no applica-tion to the overwhelming returns of California. It simply infers, that as capital is applied in larger

proportion in silver than in gold mines, the capital ist has the surer advantage in the former trai Committee for the uniform progress and the cultivation of the working classes. One of these Congresses called by Mr. William Weitling, will neet next week at Philadelphia.

Eagle Pass is not in the mining region; like the Seminole Chief, Wild Cat, it sits in the gates and make tidings of the day. Still, while in no way personally concerned in New-Mexico or her fortunes, it is impossible not to note the unanimous concurrence of every kind and class of authority in testimony of the teeming mineral wealth of the whole region north and west of us. The poverty and apathy of the people in turning it to account is about as unanimous. I give one example, and rather a favorable one, from my own knowledge. West of and at no great distance from Eagle Pass is a valuable and well known silver mine, owned has a the sign. Seeks of pare silver the size of se by a physician. Spica of pure silver, the size of a man's little finger, frequently occur in the vains, and altogether it is a rich and productive mine, but man's little linger, irequently occur in the Veins, and altogether it is a rich and productive mine, but it is subject to the great evil of all mines that are pushed to any depth—the principal leads are submerged and the water has to be continually pumped out. It is now done by mule power and the mine is languidly worked semi-occasionally when the professional dutter of the proprietor are not pressing. The expeuse of a proper pumping apparatus and its other concomitants, would cost from \$5,000 to \$10.000—and this last is a large estimate, which could soon be raised from the mine itself under vigorous management, but neither the Dector nor anybody clase among the Mexicans will do anything with it until some European miner comes along and takes it off his hands. Then, as in so many other instances in Mexico, the judicious application of a few thousand dollars in machinery and a resourable amount of systematic effort will convert this neglected mine into a steady fortune of thousands a year. There are ten thousand such openings in New-Mexico, and when it can do so with security the means of development will flow in and this "territory of little value" will become the second mineral State in the Union.

Another of our oldest inhabitants, Adelaide Soultaque, a colored creole of this city, died on Friday last, at the advanced age of between 100 and 107 years. Throughout her long life she enjoyed the friendship and respect of all classes. She leaves behind her a numerous offspring. One son alone has had by three wives 43 children.

[Mobile Hersid and Tribune. COMMON COUNCIL PROCEEDINGS.

OFFICIAL! Beard of Aldermen.

The minutes were real and approved.

By Alderman Britton, petition of D. Randolph March, for a removal of the nucreus shanter from the but kneed from the pier foot of V rees, at south it the southery line of Fulcott. Referred to the Committee on F nance.

By Ald. Cook—Petition of Jacob Vanderpool, fr. and others for the construction of a sewer in lights; between Fourth and Matham avecure. Referred to committee on remers.

Sewers.

By the same—Petition of Daniel B. Taylor, for permission to purchase a gray of land belonging to the comparation. Referred to Finance Committee.

By Ald. Frankin—Petition of Francis Cotton for relief from an erroneous tax for the year 1849. Referred to the

from an errogeous ask for the year tash. Referred to the Committee on Flushee.

By Ald Chapman – Petition of D. Raudolph Martn for the purchase or lease of the pierra the foot of Chambers at North River. Effected to the Committee on Finance.

By Ald Griffin – Potition of Thomas Young for leave to purchase common lands of the city. Referred to the Com-

urchase common lands of the city. Referred to the Continue on Finance.

By Ald Wood—Petition of E. Elsworth and ethers, for he extendion of pie at the foot of Dey at 10 the extendion in Referred to the Committee on whares piez, &c.

By Aid, Griffin—Petition of Hose Co. No. 25 for the enargement of their house. Referred to Committee on Fire

argement of their house. Releases W. Dominick and others, or the construction of James W. Dominick and others, or the construction of a sewer from Bowery to the East River. Referred to Committee on Sewers. By the same—Remonstrance of the members of Fulton for Engine Co. No. 21, against A. Van Nees' building hem a new engine. Referred to Committee on Fire. De actiment.

partment.

By the same—Petition of Engine Co No. 21, to have a new house erected for their fire apparatus. Referred to Committee on Fire Department.

By the same—Petition of a Committee of the Representatives and Exempt Firemens' Association, to have Fireman's Hall properly ventilated, and the floor covered with mating. Referred to the Commissioner of Repairs and Supplies.

Alderman Oakley, presented the following resolution which was referred to the committee on streets, viz. Resolved, This Bataviastrest between Rosevelt and James streets he repayed, and curb and gutter stones set therein as soon as the sewer directed to he built is completed, and that the street commissioner is hereby directed to the built is completed, and that the street commissioner is hereby directed to which was stopped viz.

Alderman Haws presented the following resolution which was adopted, viz.

Resolved. That the Foll of the Fifth election district of the 10th Ward be held at No. 74 findion street, in the roam formerly occupies as a Justices Court Room.

Alderman Dodge presented the following resolution which was adopted, viz.

Resolved, That South street from Rosevelt to Catharine street be regulated, regraded, curb and enter stones set on each site, statice ways built and the carriage way repaired under the direction of the street commissioner.

Alderman Delamater presented the following presumite which was adopted, viz.

Resolved, That the east side of Shraw between 23d and 20th six, be lighted with gas under the direction of the Commissioner of Street's and Lampe.

The Fresident presented the following presmitle and resolution.

schulen II heren. The ground used for Gouvergeur Market was 11 heren. The ground used for Gouvergeur Market pictors and unless it is no sed will rever theke to the helps of the grantors; and heren, this Seventh Ward Statten House does not belong

herens, the Seyonth Ward Samer and Repairs and Sup-ing the Corporation, therefore, Resolved, That the Commissioner of Repairs and Sup-dies impaire into and report whether it would not be to be interested the city to erect a boilding on the ground list will answer the purposes of a market and Station Conse for the Ward—which was referred to the Commite on Fitheren. Aid Griffin presented the following preamitte and resp-

otion vir.

Whereas, The Chief of Police, in his report to his Honor, he Major, states that the clears and chocke of the City are needed by gangs of thieves, who grey upon the property of our citizens necessarily exposed upon the docks and term; and that these thieves manage, he an exceedingly remained and shillful manner, to roo the vessels lying at our tacks and in the stream, and to carry off property taxed on vessels for the purpose of being removed to the merbands are the purpose of being removed to the merbands are the purpose.

(said stores, a.d.)
If forces, it is stated in the report that this clas of this was equestly had, at our doese and rob developes and break per stores, and commit namerous other depredations, and which we make of houses are enabled to escape from the Police or winders of houses are enabled to escape from the Police or

by means of boats are enabled to excape from the Folice or avoid detection; and, II hereas, It appears that by means of their boats river likews are clubbed to make excursions to neighboring twens and villages and bring their plunder to this City with comparative impubility; and, If hereas, it is the duty of the City authorities to affordfull and supple protection to the property of all persons engaged in mercentile pursons in this city, and, if possible, to arrest these depit dators band of lawless ment and the police force of the City heigh sufficient to afford such protection, if the means of detecting and nursuing persons engaged in authorities and conduct is provided for num—Therefore, let it.

Resolved, That the Commissioner of Repairs and Sup-

fore, be it Revenued to the Commissioner of Repairs and Supplies he directs due procure and furnits to the Mr. of and third of Police, for the use of the Folker bearinged, such antible of Police, for the use of the Folker bearinged, such antible basis, with the necessary appurionances, as the Payor and Chief of Police may direct, and that the sum of \$0.00 he, and is hereby appropriated, therefor, Ald. Miller moved to refer he same to the Committee on Police, which was carried.

And Hawsmoved to refer so much of Dec. No. 54, being the Custlerly (Reported the Chief of Folice, as related to the Ald Hawsmoved to the Chief of Folice, as related to the Custlerly (Reported the Chief of Folice, as related and product to the Committee on Police also which was carried.

The Compilies on Groton Aquedad, Department pretented a Report in favor of permitting Trustees of Fublic
School Seclety to connect resins with the sewer in 27th st.
which was adopted.
The Committee on Groton Aquedad: Department prezented a Report adverse to isying water pipes in 35d, 35th
and 40d sts which was adopted.
The Genmittee on Groton Aquedad Department prezented a Report adverse to have water pipes laid down
this season in 35d st, from 6th to 5th are which was ordered on fire

this season in 35d st. from 6th to siliars which was ordered on 5to.

The Committee on Assessments presented a Report to fever of conturing with the Report from the Board of Assessments and adopting the resolution to result the amount of \$50th is the god against Wm. Goventry, H. Waddell and others for regularing Sub-sil between Subard 6th are which was lost on a division, its stiffer and definer of regularing Sub-sil between Subard 6th are which was lost on a division, its stiffer answ. And Colamater—3. Negotire—Ald Wood, Haws, Coor, Eard, Britton, and Franklin—6.

The Chairman deciding that there was not a constitutional number elected to the Board, voting is favor the set, Alexans Cook moved a reconsideration of the foregoing vote, which was carried.

Alderman Wood then moved to lay the Report on the

Determiner and Franklin—13.

A resolution has the poll of the VIIIth Election Displict of the Lighth Ward he removed from 351 Spring; st. to No. 115 Charleton; st. which was concurred in

A report of the Committee on Sewers, in favor of rehalding as well in that between say 5 and C, which was concurred in one division viz Affirmative—Aid Griffin, Dudge, Wood, Cakley, Chapman, Smith, Haws, Miller, Shaw, Coct. Sard, Britten, Deadman, Franklin—14.

A petition of John B Dispeddein for use of Croton water and permission to tap Jis main pipe in 34-ay, at or near list st. Referred to the Croton Aqueduct Board with power.

power.

A report of the Committee on Croton Aquestict Board with report of the Committee on Croton Aquestict Department in tavor of referring petition of R. W. Townsend to tap one of the main spies for Croton water in the Sih av. at 16th at. Referred to the Croton Aquestica Board, with power, which was concurred th.

The late Fire at Carbondale

CARRONDAL F Threaday, Oct 3. Sin: At a town meeting held in this village on the afternoon of the 5th inst, it was among other things

Resolved That a Committue, consisting of Lewis Jones, Price Bytne, and Evan Harris, he appointed to address a communication to the editors of the Tribune and Herild. N.Y., contradicting cerisin's assemble make by a thouse discourse pendent, that the large amount of goods of an deed at the lane free were stolen by the miners employed in the miners at this piace, and itself the Committee procure the signatures of those merchants who said seed by the fire to the

The undersigned would only add that the miners of Carbondale are chiefly composed of Weich, Irish and Scotchmen, than whom a more nonest, conseigntions and industrious class of citizens does not exist among us, or who would more heartly exe-orate such acts as are charged by the Honesdale correspondent.

We would therefore, respectfully ask that this

ommunication, together with the above resolution, be inserted as an act of justice to those om-

LEWIS JONES, EVAN HARRIS, PETER BYRNE,

The undersigned, merchants of Carbondale, sustaining loss by the late fire, concur in the above. Gillespie & Love, Jasper Stuck.
Sweet & Raynor, T Dickson & Co. Wim Burman, H McLasghin, Jasrjamin & Co. N. Davison.
Pairick Moffit, Solomon Arnold,

A Carbondale correspondent writes, Oct. 3, as follows:

In that absurd statement sent you from Hones-dale, relative to our late disastrous fire, your in-formant says some 50 buildings were burned, or two-thirds of the village For the information of some of your readers, I

would state that our population is supposed to be seven thousand, and that we have Mors than twenty five buildings (your correspondent's other

third) yet standing.
To those acquainted here I would say contracts are already made—buildings are being framed, and within a few weeks we expect a very different appearance on our burned district, and if you could hear the prices asked fur loss burned overyou would allow that some enterprise, was left yet.
